

Reforms in the company account and the ordering of Valtti cards

The ordering of Valtti cards and adding employee data will be moved from the Ilmoita service to new services, namely the Employee Management service and the Card Service.

After the reform, the users of the new service must **verify their identity by using their online banking credentials before they use the service for the first time**. In addition to this, a person who has the right to sign on behalf of the company must **verify the company account** by September 2023 at the latest. These measures aim to enhance the information security of our services and to reduce the risk of misuse.

At first, a company account can only be verified by Finnish companies where the details of the Finnish person who has the right to sign on behalf of the company can be found in the trade register. The person who has the right to sign on behalf of the company must verify their identity either by using online banking credentials or a mobile ID. In addition to Finnish online banking credentials and a mobile ID, the users of the service can use a SmartID (Estonia, Latvia, Lithuania) or FrejaID (Sweden) for the authentication.
